MANUFACTURED BY

THE CASE, LOCKWOOD & BRAINARD CO.,

HARTFORD, CONN.

CIRCULAR.

We present you herewith our Illustrated and Descriptive Catalogue and Price List for 1881.

In the preparation of this volume we have aimed to bring together all goods of corresponding class, and to furnish full and complete lines of the different styles, so that parties in selecting Hardware for Dwelling Houses or Public Buildings will be able to match the Style of Architecture with goods that harmonize in every respect.

We would call special attention to the New Styles of Goods made in Genuine Bronze Metal or Polished Brass, all of which will be finished in the best possible manner, and furnished at prices as reasonable as possible consistent with the cost of production.

The List Prices of all our Goods will be found in this book, except Locks, Knobs, etc., pages 251 to 438, the list of which will be found in our Blue Lock List. For further particulars we refer you to our Discount Sheets, which will be issued to the trade from time to time as the state of the market may require.

P. & F. CORBIN.

INDEX.

The above Locks are Japanned Red, but Black will be furnished to order.

BUCKMAN'S PATENT

SPIRAL DUPLEX SPRING BUTTS.

THESE IMPROVED SPRING HINGES combine *beauty of design* and *excellence of construction* never before attained in any other Hinge. They are so constructed in detail that a greater amount of *spring power* is obtained than in any other Hinge of the same size now before the public. Nothing but *first-class* material is used in their manufacture. The *Springs*, the vital point in all Spring Butts, are made from the *finest Cast Steel Wire*, manufactured and tempered expressly for that purpose. All Springs are *thoroughly tested* before being placed in a Hinge.

Among the many important advantages claimed for this HINGE over others, are the following:

1st. It will allow the Spring to be removed and a new one inserted without *unhanging the door*, or *removing any of the working parts.*

2d. All the working parts are made from the best Malleable Iron, and are of *extra strength*, thus rendering *breakage* unusual, as is too often the case in this class of Hinges of other manufacture.

3d. The Double-Acting HINGES have *right and left hand* Springs, which have the effect of equalizing the pressure on the door when it is swung in either direction.

4th. The Springs in these HINGES are so situated that great power is secured when the door is closed, thus preventing the door—when it is a double-acting one—from being moved from its position by drafts and gusts of wind.

All the various sizes, from three to twelve inches, for hanging doors from three-quarters of one inch to three inches in thickness, are kept in stock. The same sizes, in Iron, Bronzed, Nickel and Silver Plated, will be furnished to order. Other sizes, of special designs, will be manufactured at reasonable rates.

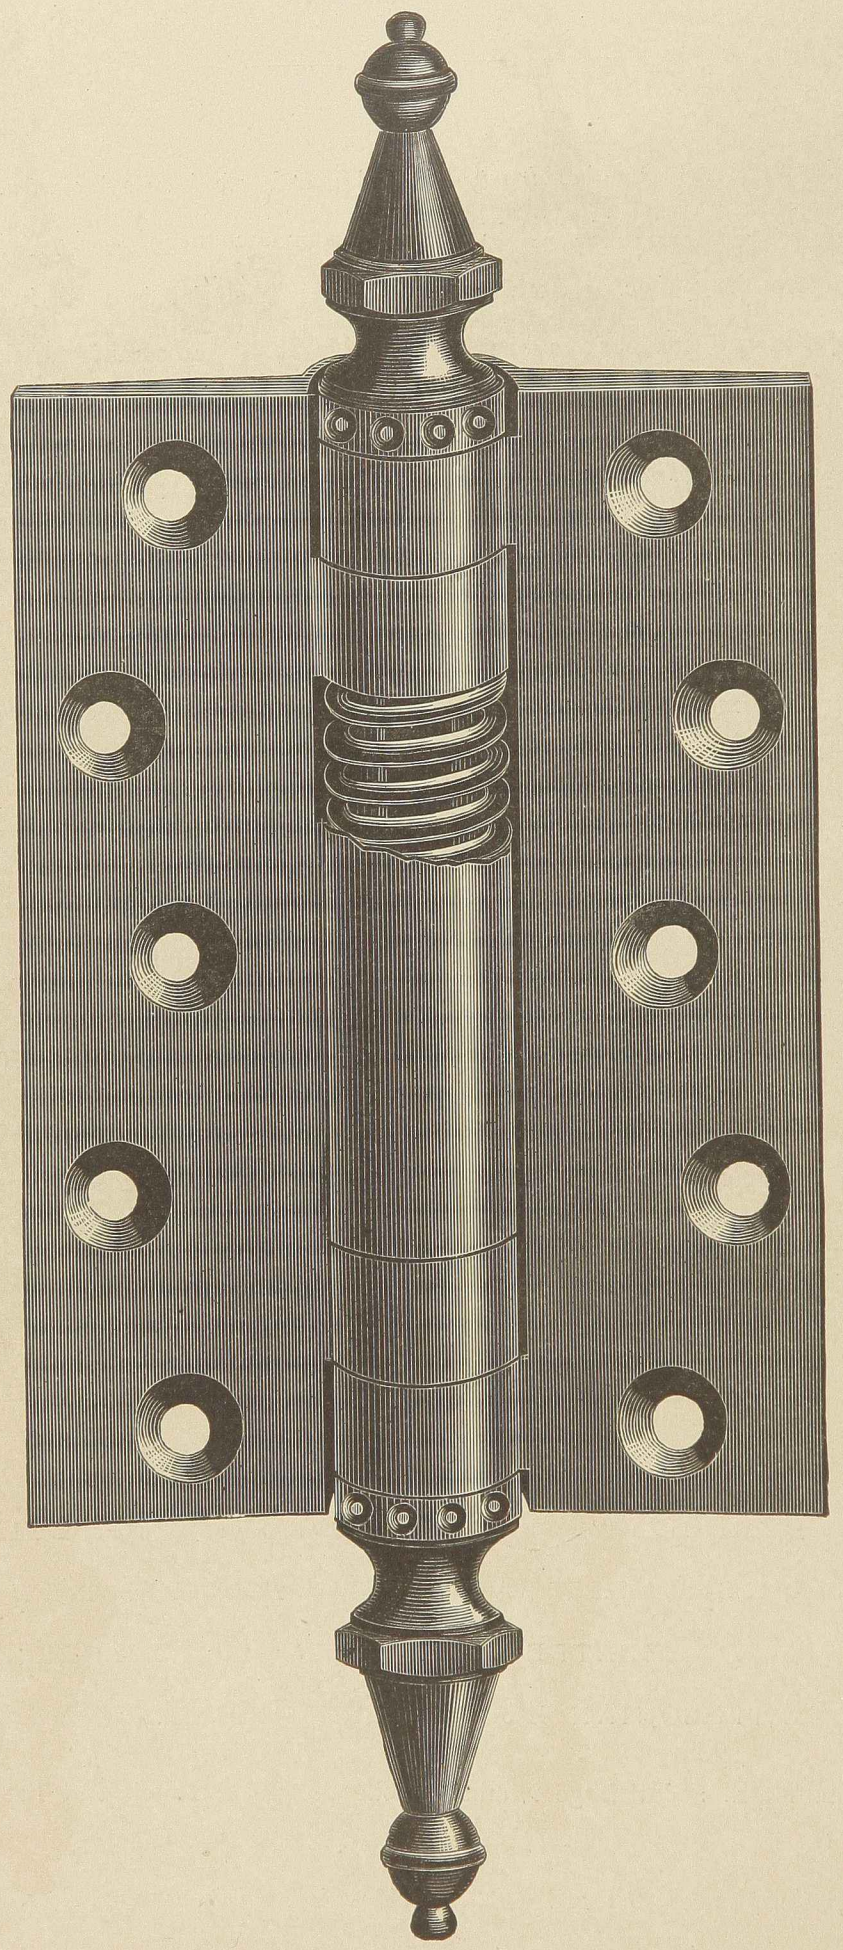

These HINGES have been practically tested in many Public and Private Buildings in different parts of the country. They have been applied, and given perfect satisfaction, on such extensive structures as the

METROPOLITAN LIFE INSURANCE CO'S BUILDING, NEW YORK CITY;
TREASURY BUILDING, WASHINGTON, DISTRICT OF COLUMBIA;
ST. PATRICK'S CATHEDRAL, FIFTH AVENUE, NEW YORK CITY;
NOVELTY THEATRE, BROOKLYN, NEW YORK;
SMITHSONIAN HALL, GREENPOINT, LONG ISLAND;

Besides Public Buildings in Boston, Mass., and a large number of the prominent Hotels and Banking Houses in New York City.

(See Illustrations, pages 582 and 583, and Descriptive List, with Prices, page 584.)
